# NORDIC HF CONFERENCE

14-16 AUGUST 2001

**FÅRÖ, GOTLAND, SWEDEN**

The Nordic Radio Society invites authors and participants to the 6th Nordic HF conference. Topics focus on communications beyond the horizon, with emphasis on HF radio. Meteor burst, troposcatter and small-terminal satellite communications are also of interest in applications where such systems may compete with HF.

HF 01 topics of interest include:

- User requirements and experience
- Propagation studies and modelling
- Costs of HF communications and alternatives
- Interference and noise
- Modulation and coding
- Link control
- Network architectures
- Novel multimedia applications
- Equipment and systems
- Electronic countermeasures
- Electronic counter-countermeasures
- Simulation, modelling and evaluation

There will also be an exhibition.

Contact the HF 01 Secretariat to be included in our mailing list for further information:
