

NORDIC HF CONFERENCE

10–12 AUGUST 2004

FÅRÖ, GOTLAND, SWEDEN

The Nordic Radio Society invites authors, exhibitors and participants to the 7th Nordic HF conference. Topics focus on communications beyond the horizon, with emphasis on HF radio. Meteor burst, troposcatter and VLF/LF communications are also of interest in applications where such systems may compete with HF.

HF 04 topics of interest include:

- User requirements and experience
- Interoperability issues
- HF role in network centric warfare
- Propagation studies and modelling
- Interference and noise
- Modulation, coding and link control
- Network architectures
- Equipment and systems
- HF in software defined radio concepts
- Multimedia access and applications
- HF radar
- HF digital broadcast
- Electronic warfare
- Simulation, modelling and evaluation

Take your time to meet colleagues in the unique nature scenery of Fårö, while enjoying modern conference facilities with free internet access. Accompanying family members are welcome.

Contact the HF 04 Secretariat to be included in our mailing list for further information:

HF 04
